

UPSkill Applicants Workshop

1S2627 | Companies You Know, Data You Can Use

Overview

Workshop Title: UPSkill 1S2627 - Companies You Know, Data You Can Use

Date & Time: Sep 17, 2026 | AM 9:30-12:35 | PM 2:30-6:00

Venue: [TBD onsite] / Zoom backup

Speaker: Galvin M. Gonzales (Event Head; AM & PM)

Org: UPLB Data Science Guild

Objective

Absolute-beginner first look at Data Science using real Philippine companies applicants already know. Outputs: cleaned familiar-ticker sheet (AM) and a simple Colab shortlist (PM).

Rationale

Beginner-first room. Speaker can connect the session to a real Guild-adjacent project in plain language. Familiar tickers (SM, Jollibee, BDO, Globe, Meralco...) create relevance; offline curated snapshot keeps setup safe. Colab removes local install friction. Educational use only - not investment advice.

Program Flow

[1] Spreadsheet foundations with familiar PSE names (AM) | [2] First Python screen in Google Colab (PM).

Pairs allowed. PTC floater catches blockers. Share-outs optional (30-60s). Open Colab before PM starts.

Topic Outline - Session 1 (Sheets)

Progression: messy familiar-company table -> readable sheet + one careful insight.

Core topics: interface, sort/filter, formatting, IF/IFERROR, one chart, missing-data hygiene. Plain metrics only (price, dividend yield %, completeness).

Output: cleaned tab + 1 chart + 1-2 bullet insights.

Topic Outline - Session 2 (Colab)

Progression: linked CSV in Colab -> shortlist you can explain in one minute.

Core topics: run cells, head/shape, count missing, boolean filters, sort, simple bar chart. No ROIC/ML on the main path. Completed notebook fallback provided.

Output: shortlist + rule used + one data caveat.

Resources

AM Sheet: [TBD publish link] + answer-key tab

PM: Google Colab (browser only) + demo_company_metrics.csv

CSV path: workshop/upskill-1s2627/resources/demo_company_metrics.csv

See BEGINNER_SPEAKER_NOTES.md for dual-role and pedagogy guardrails.

Speaker Bio

Galvin M. Gonzales - Event Head and AM/PM speaker. Teaching thread: beginner-accessible workflows on real Philippine listed-company snapshots - clean, question, and filter without assuming prior coding experience. Hosts/PTC handle logistics and MCing.
