

UPSkill Applicants Workshop

1st Sem AY 2026-2027 | From Filings to Insight

Overview

Workshop Title: UPSkill 1S2627 - From Filings to Insight

Date & Time: Sep 17, 2026 | AM 9:30-12:35 | PM 2:30-6:00

Venue: [TBD onsite] / Zoom backup

Org: UPLB Data Science Guild

Objective

Give participants an initial look into Data Science using prepared Philippine company financial metrics as the running example, while setting a baseline for future Guild workshops. Tangible outputs: a cleaned spreadsheet table (AM) and a personal mini stock screen notebook (PM).

Rationale

Applicants may be new to DS or come from adjacent backgrounds; some will want more technical depth. Keep coverage broad, spark interest, and deliver hands-on takeaways. Theme is inspired by turning public market disclosures into structured tables - without live scraping. Applicants use curated demo CSVs/sheets only.

Program Flow

[1] Spreadsheet cleaning & exploration (AM) | [2] Python/Pandas mini stock screen (PM).

Ingress ~10-15 mins. Incentives for attending both sessions. Install Python tools before PM. Questions welcome anytime. If applicants present, reserve 15-20 mins.

Topic Outline - Session 1 (Sheets)

Progression: messy financial extract -> organized, chart-ready sheet.

Topics: interface, shortcuts, sort/filter, formatting, essential formulas, charts, light data-quality habits (blanks, duplicates, scale notes).

Guide Qs: formula showing as text; fill-down; #VALUE!; split ticker/name; flag missing ratios; chart top 10 by metric.

Output: cleaned sheet + 2-3 bullet insights.

Topic Outline - Session 2 (Python)

Progression: prepared company-metrics CSV + blank notebook -> filtered shortlist with plot.

Topics: notebook workflow, DataFrames, CSV import, missingness, filters, derived metrics, Matplotlib, communicating thresholds and caveats.

Guide Qs: count nulls; run a cell; why DataFrames; multi-condition filters; absurd ratios; export CSV.

Pedagogy: offline demo data only; interpretable metrics; educational disclaimer (not investment advice); ML optional/out of scope for applicants workshop.

Output: screening notebook + 5-10 name shortlist with rationale.

Resources

AM working file: [TBD Google Sheet / Excel starter]

PM pre-install: Python 3.10+, VS Code or Jupyter, demo CSV

pip install matplotlib numpy pandas

Demo CSV path in repo: workshop/upskill-1s2627/resources/demo_company_metrics.csv

Speakers Bio

AM Speaker: [TBD after Sep 10 Speakers Meeting]

PM Speaker: [TBD after Sep 10 Speakers Meeting]

Prepared for UPSkill 1S2627 | Event Head: Galvin M. Gonzales | Draft: Sep 6, 2026
